

PHYSICS LAB
Lab Safety Policy

All students are asked to wear closed toe/heel shoes to the lab. Do not wear clothes or jewelry that may interfere with lab equipment (loose long sleeves, dangling bracelets, etc.) or that would prohibit you from participating in lab activities (standing on chairs or skateboards or kneeling on the floor). Do not wear anything that you value in the lab. All other safety equipment (goggles, gloves, etc.) will be provided in the lab. Horseplay is dangerous in a laboratory setting and students who are acting in a manner that is not safe will be asked to leave the lab and will be given zero credit for the lab. It is important to keep the lab a safe, clean environment. You may not eat or drink inside the labs at all. Always keep the equipment and the lab tables organized. Leave your lab table as clean as you found it. If you litter in the lab or leave your table in disarray, everyone at your lab table will lose points from your in-lab grade. Be attentive and refrain from cellphone use and other distracting activities.

By signing, you acknowledge that you understand this safety policy, and that violations of this policy will not be tolerated.
